Distinguished District

District Status

South Dakota's accountability system requires schools and districts to make adequate yearly progress (AYP) in both math and reading, based on results of the Dakota STEP test. The chart below indicates an entity's current status with an "OK" (meaning it made AYP), "Alert" (meaning it did not make AYP for the current year) or "Level 1, 2 or 3" (meaning that it has not met AYP for at least two consecutive years). The chart also breaks down AYP progress by subgroups, using a "Y" (yes) to indicate subgroups that made AYP, and "N" (no) to indicate subgroups that did not make AYP.

*Total AYP Breakdown indicates the number of subgroups in which a school or district made adequate yearly progress (AYP), followed by the total number of subgroups for which they were held accountable. In the chart above, all subgroups for which a school or district is held accountable are shaded in green. Yellow shading indicates that a school or district is not held accountable because of an insufficient population in that subgroup.

Teacher Qualifications

The federal No Child Left Behind Act requires that each school report the percent of its teachers who are highly qualified. The act defines a highly qualified teacher as one with full certification, a bachelor's degree and demonstrated competence in subject knowledge and teaching. The act calls for all teachers of core academic subjects to be highly qualified by the end of school year 2006-07. Core subjects include English, reading or language arts, mathematics, science, foreign languages, civics and government, economics, arts, history and geography. This page shows the percent of classes NOT being taught by highly qualified teachers. A high poverty school is defined as being in the top quartile of poverty statewide or districtwide, based on the percentage of students eligible for free or reduced-price lunch. A low poverty school is defined as being in the bottom quartile of poverty statewide or districtwide, based on the percentage of students eligible for free or reduced-price lunch. *Indicates there is a tie in the free and reduced lunch percentage for two or more schools. This results in a difference in the number of schools being allocated to the Highest and Lowest Quartiles. **Indicates a district has only one school and a District Quartile cannot be calculated.

Teachers with Emergency or Provisional Credentials

It has been determined that South Dakota does not offer an Emergency or Provisional License. This information is therefore not being reported for 2009.

Districtwide, Classes Not Taught by Highly Qualified Teachers

State : 1.7%

Districts and Schools Identified for Improvement

This list includes districts and/or schools that the state of South Dakota has identified as in need of improvement, as determined by state's accountability system.

Attendance/Graduation Rates

The graph(s) below report the attendance or graduation rate for the requested entity. For elementary/middle schools, an attendance rate is reported. For high schools, a graduation rate is reported. For districts and the state, both attendance and graduation rates are reported. The attendance rate is reported as a percentage and is calculated by dividing the aggregate days of attendance by the aggregate days of membership for all students enrolled. Please note that the Department of Education is changing the way it calculates graduation rate, in an effort to make it a more accurate count. The graduation rate is calculated as follows: divide the total number of graduates (completers) by the total number of graduates (completers) plus 11th and 12th grade dropouts.

Assessment Results

Students in grades 3 through 8 and grade 11 completed the Dakota STEP test in the spring of 2009. The test is designed to measure the progress of students on the South Dakota Content Standards in Reading and Math. This report summarizes the results of that assessment. Please contact your local school if you have questions about this information.

South Dakota Results for NAEP 2007

The National Assessment of Educational Progress (NAEP) or the “Nation’s Report Card” is administered on a biannual basis to a sample of 4th and 8th graders in every state. The most recent NAEP data available are for the 2007 administration. Each student takes a portion of a reading or mathematics assessment. The NAEP results are reported for the state as well as the nation and there are no published school or district results.

For some small subgroups in South Dakota the reporting requirement is not met and therefore no data are available. Therefore, race/ethnicity and Limited English Proficiency data are not consistent across all the reports. .

NAEP achievement levels are not necessarily equivalent to proficiency levels used with South Dakota’s state assessment, DSTEP. For more information on the mathematics and reading achievement levels go to:

[Http://nces.ed.gov/nationsreportcard/mathematics/achieve.asp](http://nces.ed.gov/nationsreportcard/mathematics/achieve.asp) or
<http://nces.ed.gov/nationsreportcard/reading/achieve.asp>.

Participation Rates

Participation rates for Students with Disabilities and Limited English Proficient can be found in the table below. The actual participation rates for NAEP will differ from DSTEP rates since NAEP does not allow all the accommodations used by DSTEP. Students taking DSTEP-A do not participate in NAEP.

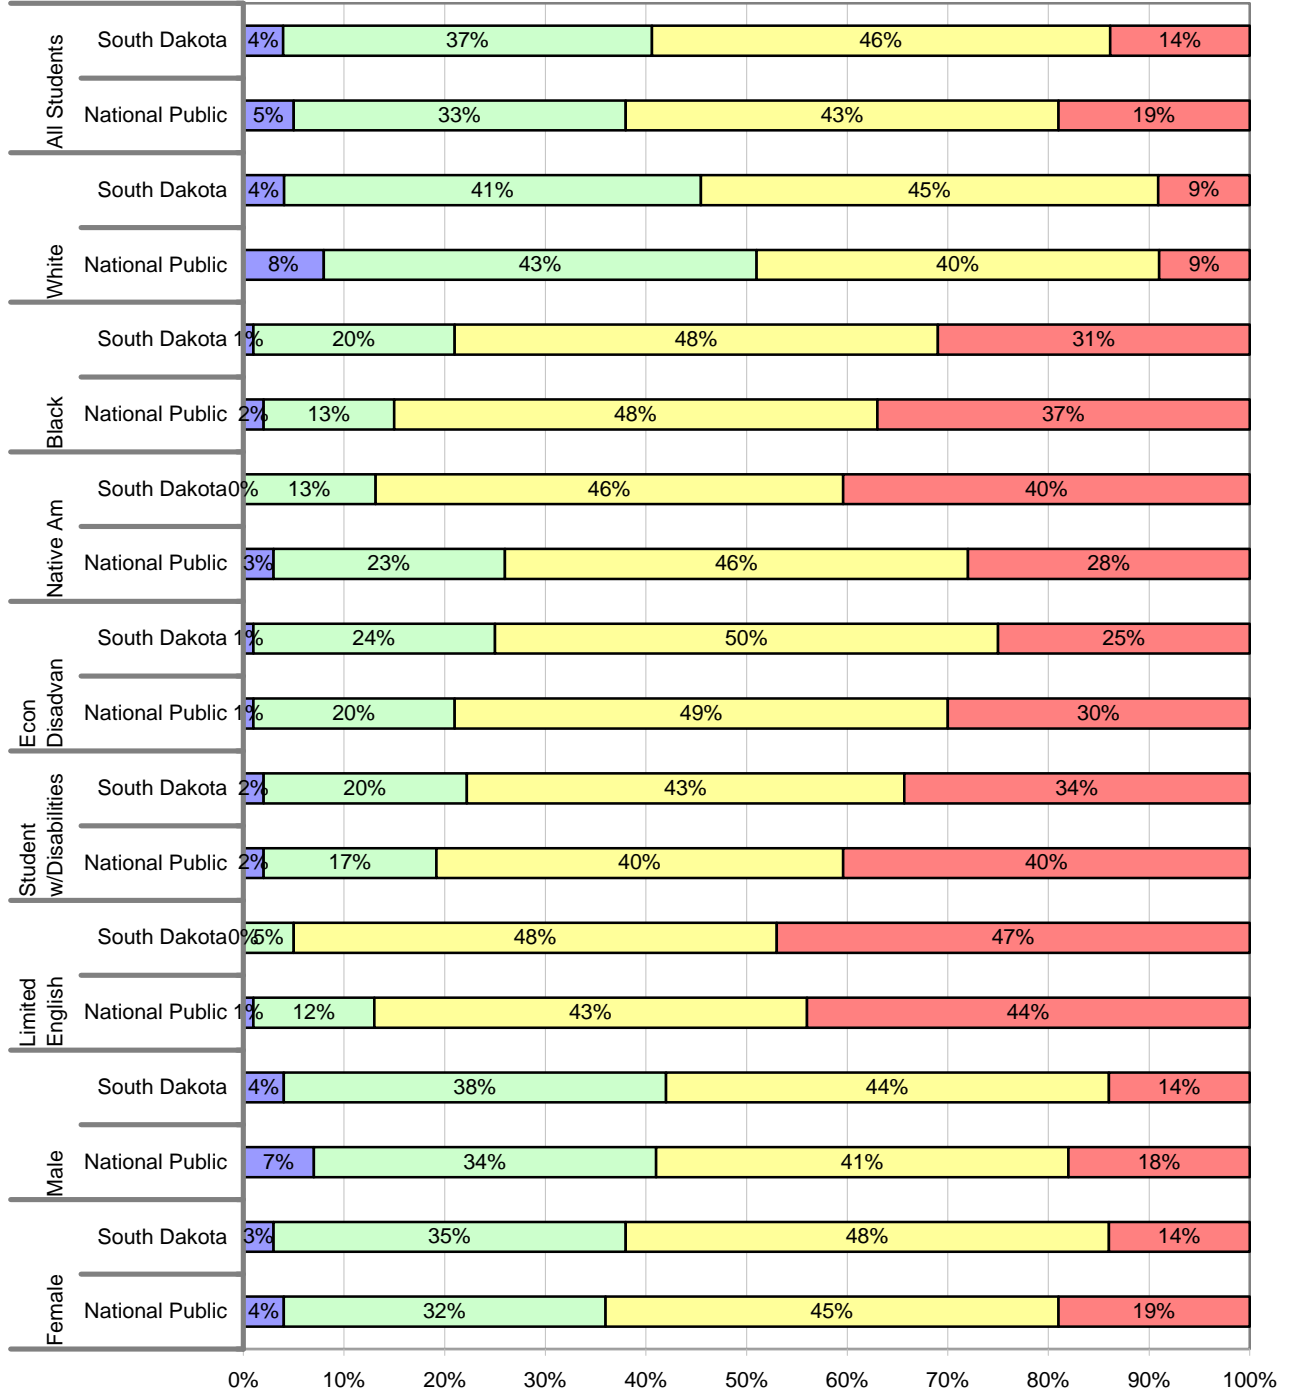

Students with Disabilities	Reading	Mathematics
Grade 4	64%	92%
Grade 8	50%	78%

Limited English Proficient	Reading	Mathematics
Grade 4	80%	95%
Grade 8	69%	82%

If there are questions about the NAEP data, contact the South Dakota NAEP State Coordinator, Jan Martin at jan.martin@state.sd.us.
